Steelcase **SIG** WORKPLACE

YOUR OLOGY INTERFACE IS CHANGING.....

Please note that new orders of Ology will come with new user interface as indicated below

CURRENT Programmable Lift Interface

NEW Active Touch

Active Touch reminds users to change posture with Active Motion: subtle desk movements that encourage users to move throughout the day. Users can create a profile with preset desk heights and preferred intervals of sitting and standing.

CURRENT Intuitive Lift Interface

NEW Simple Touch

New up/down control with improved function and design replace standard up/down control. Simple Touch allows for intuitive adjustments, enabling users to quickly and quietly change postures by tapping the controller in the direction they'd like the desk to move. Available in antimicrobial surfaces to support a more health-conscious environment.

NEW RISE APP

Works With Active Touch Desks

Workers spend a significant portion of their lives at work — often sitting for hours at a time, every day. To encourage healthy postures and movement Steelcase developed the Rise app, making it simple for workers to take workplace wellbeing into their own hands.

When users connect their Rise app to any compatible desk, the saved settings are automatically applied, saving users time and headspace, no matter which office building or campus they are working at. With posture and activity tracking and an option to set movement reminders throughout the day, users will experience healthier, happier and more productive days at work.

SOON AVAILABLE IN THE APP STORE OR GOOGLE PLAY

WHAT IS NOT CHANGING

- No change in pricing or discounting.
- No change to model codes.
- No change to desk aesthetics apart from controllers.
- No change on Ology Eco desk system.
- 5 Year warranty on existing Ology Desks.

WHAT IS NEW

- New electrical system for controllers means they are not retrofittable on existing product in the market. However existing customers can still order the old system if they wish to do so until November 2018.
- New system uses 66% less energy in standby mode.
- Collision sensor as standard in new desks.
